

ControlTek designs and manufactures custom cables to support a variety of applications and industries including Automotive and Industrial products, Medical equipment, and Aviation / Space and Defense (ASD) assemblies.

#### QUALITY, ON-TIME ASSEMBLY THAT MEETS YOUR REQUIREMENTS

Our cable assembly team takes pride in producing high quality interconnect cable systems that meet IPC/WHMA-A-620 standards.

#### RF CABLE TESTING SERVICES FOR KNOWN GOOD ASSEMBLIES

We believe testing is critical to providing “known good” assemblies. That’s why we offer a host of testing tools to ensure functionality.

Power Cables	6 GHz Real-Time Spectrum Analysis
Communication Cables	100 MHz - 2.5 GHz Vector Signal Generation
Coaxial/Triaxial Cables	VNA up to 42 GHz
Ribbon Cables	Hi-Pot Testing up to 6,000 volts
Military Style Connectors	Ground Bond Testing
Wire Kits	Crimp Pull / Tensile Testing
Complex Wire Harnesses	Radiated Emissions Baseline
	Continuity Testing

#### PUT OUR INVESTMENT TO WORK FOR YOUR PRODUCTS

ControlTek’s fully automated cable processing center quickly cuts, strips, tins, and seals wire assemblies to provide even more competitive services for our cable assembly customers.

Take advantage of our investment in the latest automatic strip, termination and testing equipment to meet even your toughest industry-specific requirements and standards.
